North Dakota
Public Safety Communications
Governance Structure
As of July 2024

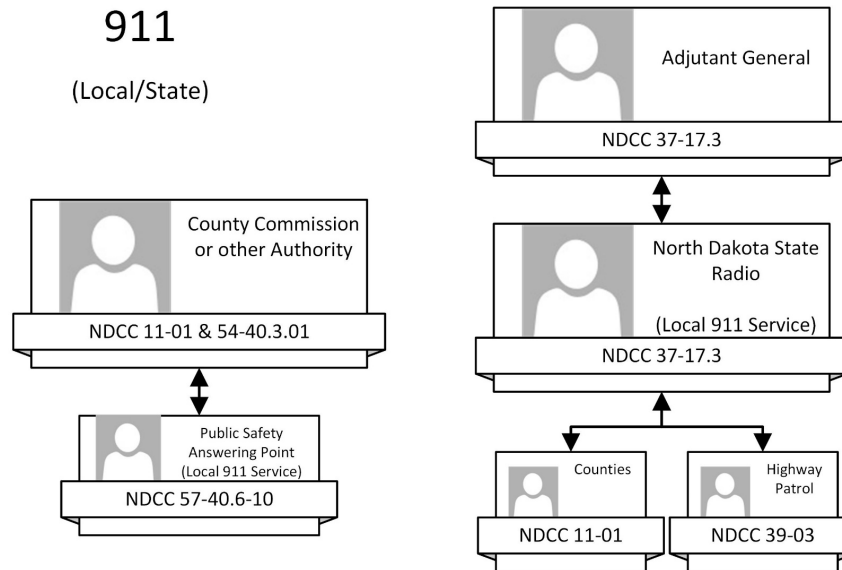

911

(Core)

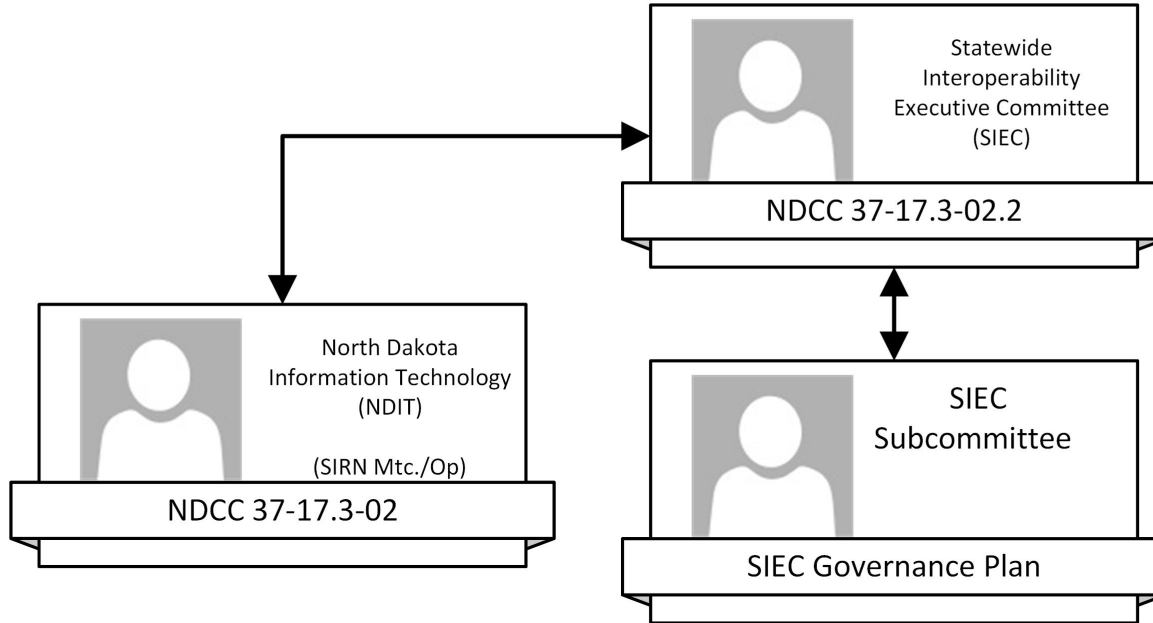

911

(Local/State)

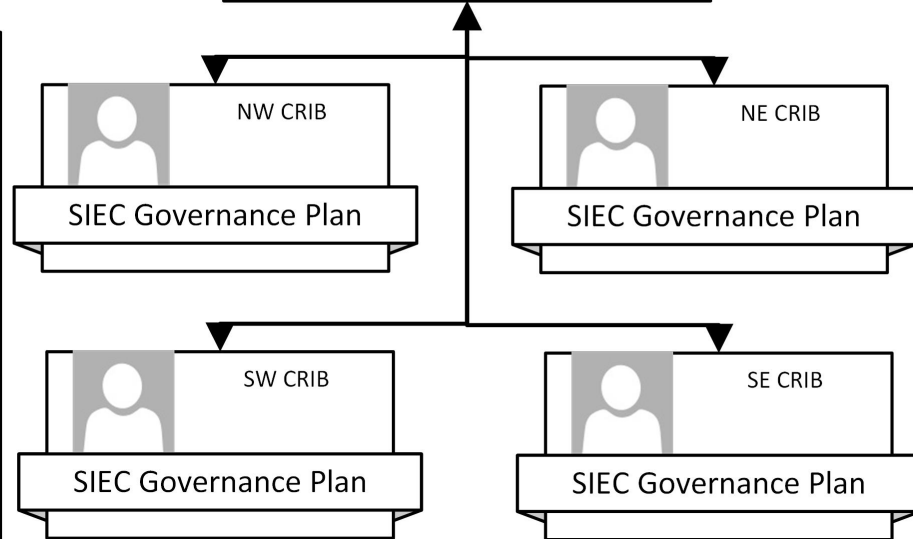

Radio

(SIRN)

Radio & Paging

(State & Local Frequencies)

FirstNet (PSBN)

Single Point of
Contact (SPOC)

National Telecommunications and Information
Administration (NTIA)

Other PSBNs and Emerging Technology

Interoperability

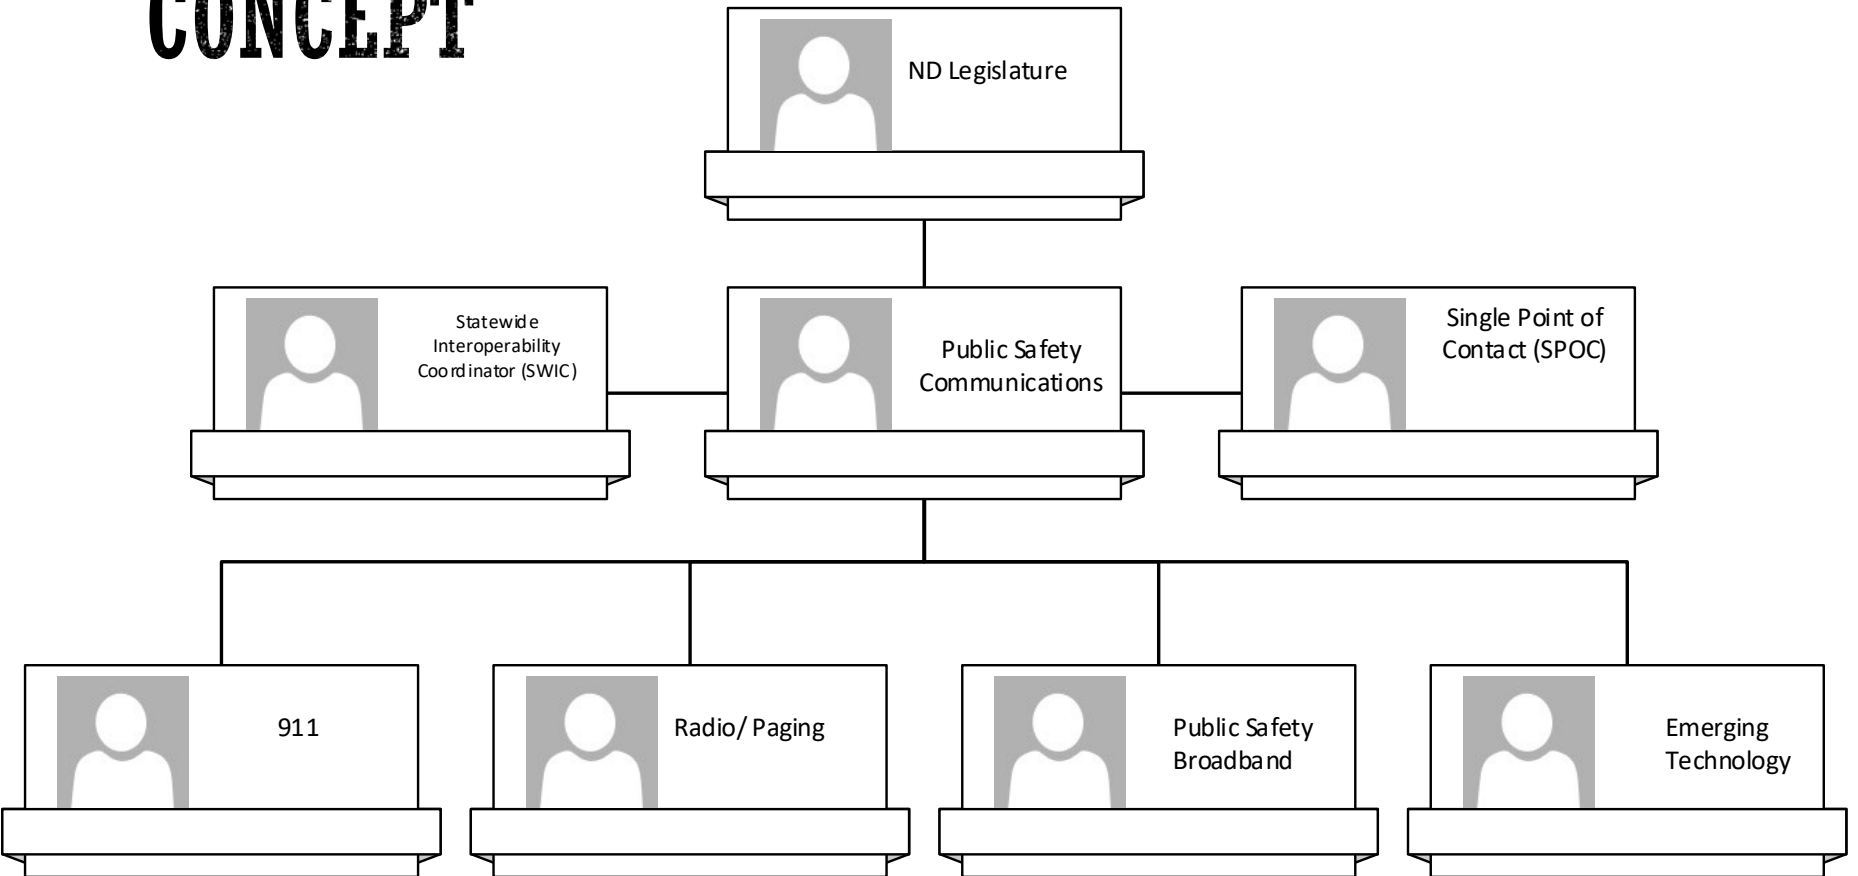

Statewide
Interoperability
Coordinator (SWIC)

Department of Homeland Security (DHS)

DRAFT CONCEPT

EMERGENCY COMMUNICATIONS SYSTEMS

Benefits of NG9-1-1 – USDOT - NHTSA

FirstNet and Next Generation 9-1-1 – First Responder Network Authority

9-1-1 CURRENT STATE

- 20 Primary Public Safety Answering Points
- 2 Secondary Public Safety Answering Points
- 1 Core Network – Connects PSAPs Together
- 312 Full Time / 27 Part Time Telecommunicators
- IP Network to all PSAPs complete
- IP Network to OSPs 85% complete
- County-sourced GIS database to support NG9-1-1 complete
- All PSAPs have equipment to support receipt of NG9-1-1 calls
- ND recognized nationally as a leader in 9-1-1 modernization
- 288K 911 calls in 2023 or appx. 33 911 calls an hour

9-1-1 FUTURE STATE

- Complete 9-1-1 “core” upgrade for PSAPs
- Recent FCC Report and Order signed 7/18/2024 will help
 - (PS Docket No. 18-64)
- Interconnect NG9-1-1 and Public Safety Broadband Networks (i.e. FirstNet, Verizon, T-Mobile).
 - Enables PSAP to share media w/ Dispatch (e.g. photos, video, data)
- Interoperability
- CAD to CAD

PUBLIC SAFETY BROADBAND

NDIT

PUBLIC SAFETY BROADBAND CURRENT STATE

- Public Safety Broadband Offerings
 - FirstNet by AT&T
 - Verizon Frontline
 - T-Mobile for Government
- Why should I use a Public Safety Broadband connection?
 - All PSBN offerings support priority and preemption
 - PSBN plans are typically lower in cost than personal plans

PUBLIC SAFETY BROADBAND FUTURE STATE

- Ideally, all primary first responders have a connection to one of the Public Safety Broadband offerings (FirstNet, Verizon, T-Mobile) through their mobile data terminals or smart phones.
- PSAPs are connected to all three offerings
- Secure connections are made between the state's ESInet and PSBN networks.

PUBLIC SAFETY NETWORK

- Not to be confused with PSBN cellular networks.
- Need identified by the PSAPs to eliminate the need for separate network expenses for multiple critical services they utilize (911, SIRN, Cloud-based CHE, Cloud-based CAD, NLETS, etc).
- No work has begun on this topic and the future is uncertain.

RADIO AND PAGING CURRENT / FUTURE STATE

LEGISLATIVE AND LOCAL FUNDING DISCUSSIONS

LEGISLATIVE TOPICS – OVER THE YEARS

- **Why do we need so many PSAPs?**
- **Elimination of the 911 Fee**
- **Emergency Communications Governance**

FUNDING - 911 FEES VS COST OF 911

- Total 911 Surcharges - \$18.5M/yr
- SURN Portion of 911 Surcharge – \$4.5M/yr
 - 911 (Core + PSAP) Cost - ~ \$30M
- General Funds Typically Cover Shortfall (\$11.5M)

- All Emergency Communications Expenses?
 - Radio
 - Paging
 - \$?
